Northwest Current Incident Details

Incidents not Previously Reported:

Incidents Previously Reported: 1

McBee Command WA-SPD-000253. ICT4. 6 miles West of Richland, WA. Start 7/14. **Full Suppression**. Cause: human. 1,800 acres (+100). 100% containment. Grass. Minimal fire behavior. **Last report unless significant activity occurs.**

Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD) (link)

None currently reported.

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

Northwest Fire Potential Summary

Slow moving low pressure will bring a cooler, showery weather pattern to the region through Monday. Thunderstorms have the potential to produce locally heavy rain. Although, large fire potential remains low, lightning activity may bring an increase in initial attack. Gusty conditions associated with thunderstorms will be of concern in areas with light and flashy fuels.
